

HP Pavilion 17-f004dx Individual Keyboard Key Replacement

This guide will show you how to replace individual keys on your keyboard.

Written By: Noa Shadmon

INTRODUCTION

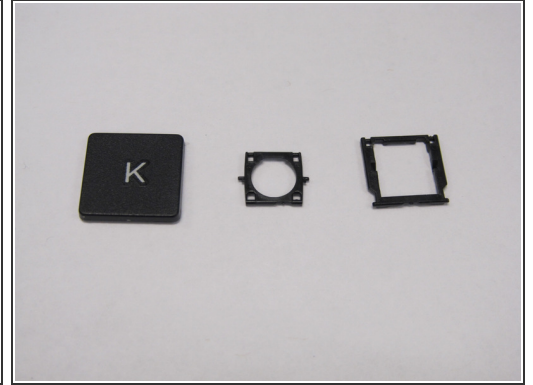

Please follow this guide only if you are having trouble with a few keys. If numerous keys aren't working, you may have to [replace the entire keyboard](#).

TOOLS:

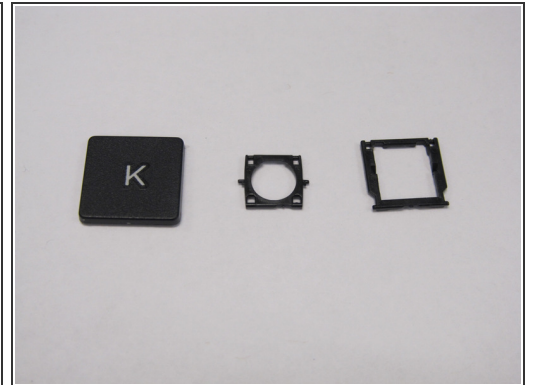

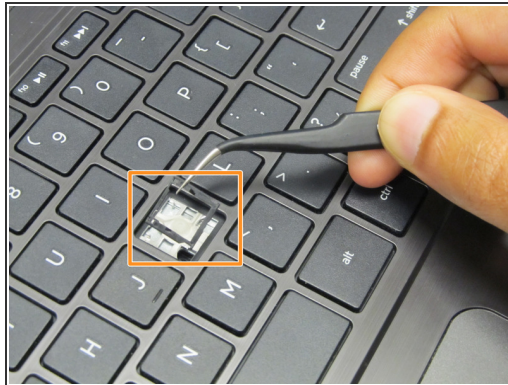

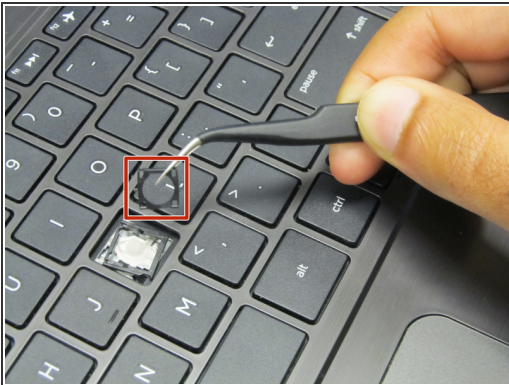

- [iFixit Opening Tools](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Individual Keyboard Key

- Carefully remove the key by prying at least two sides up with the plastic removal tool.
- ❗ There are two square, black pieces under the key. A smaller piece may be stuck to the back of the key piece.

Step 2

- Remove two square black pieces from the area under the key with a pair of tweezers.
 - Remove a small square piece first.
 - Remove a larger square piece next.

Step 3

- Once the key is removed, use a clean cloth or cotton swab to remove any particles.

To reassemble your device, follow these instructions in reverse order.
